

CASE STUDY INTAKE FORM

Company Name: Metrotainment Cafes

Company Website: <http://metrocafes.com>

Contacts Name and Title: Jeff Landau/CEO & Ken Storr/Director of Purchasing

NAMES OF RESTAURANTS IN THE GROUP:

- Einstein's
- Hudson Grille (7 locations)
- Joe's on Juniper
- Guaco Joe's
- Cowtippers
- Metrotainment Bakery
- Sugar Shack

LOCATION

All of the above

WHAT WAS DONE (IN DETAIL TO EACH LOCATION)?

A Level 1 energy audit was performed at each location. The Level I is the basic starting place for creating energy optimization. It entails an overview of the facility's utility bills and additional data, and a walk-through of the building. The Level-1 audit is focused on the identification of the potential for energy efficiency improvements, understanding the overall building configuration, and defining the type and nature of energy systems.

RESULTS (TEXT SUMMARY AND ANY SAVINGS – MONEY OR ENERGY):

The energy audits found the total annual savings opportunities over \$100,000. Obviously, Metrotainment will need to invest into multiple capital investments to attain these savings. These capital investments have an overall simple payback of 1.3 years.

QUOTE FROM CLIENT ABOUT GWT2ENERGY AND THEIR EXPERIENCE WORKING WITH YOU:

Metrotainment Cafes and their employees have a vision on becoming more sustainable in a variety of ways. The energy and water side of the equation is just one piece of their long term plan. They are currently buying food locally when available for their menu and are looking to start composting their food waste within the next year.

TOP 3 THINGS THAT MAKE THIS STORY GREAT?

1. Water was a big win in that we found over \$9,700 savings annually by making only a few inexpensive equipment change outs.
2. Although Metro had already begun retrofitting their Front-of-the-House lighting to LED, we found several opportunities in the Back-of-the-House.
3. In reviewing their utility bills, we notice several capacity charges that we may be able to get reduced; saving over \$5,000 per year.
