

GWT2Energy utilizing Power Kiosk is a multi-faceted company that now uses data intelligence and competition to reduce the costs for any business paying an energy bill.

BRINGING INNOVATION  
TO YOUR PROCESSES

HELPING YOU CENTRALIZE  
AND OUTSOURCE WISELY

TURNING YOUR DATA  
INTO SOLID DECISIONS

## What Power Kiosk does for you?

Find the lowest rates and maximize your utility savings

Power Kiosk merges data intelligence and market advisory into one source

- Constantly watches the market for pricing opportunities
- Understand your usage patterns to determine the best strategy for cost reduction
- Combining optimal market timing with the right strategy allows you to lower your energy spend

Applying our data intelligence tools to bring you competitive advantages

- Know when the best time to renew your contract is
- Better budget your spending
- Reduce operation costs

## What makes us different?

### Market Timing

Our business intelligence tools constantly watch the energy markets to identify the best times to price, and alerting us when there are significant dips in the market.

### Lowering Supplier Margins

We build efficiency by connecting directly to over 90s suppliers, using our pricing desk to build cost effective solutions. Using a “reverse auction” creates competition for your business, where each supplier has chances to bid and undercut their competitors to your benefit.

### Customized Solutions

We are your energy partner, always bringing you the most optimal solutions to protect you from market risk and capitalize on market opportunities.

At GWT2Energy, utilizing tools like Power Kiosk, we bring choice, intelligence, and transparency to your energy needs. With accurate market timing, data intelligence, and analytics we deliver optimal outcomes and procure with clarity.

We make understanding your supply options, savings and budget forecast comprehensive and simple. Review the best bids available to your business and take advantage of supplier competition and saving opportunities.
